

Cable sets for
highest demands

Flexible and individual

Our know-how for the targeted implementation of your needs

As a competent partner, we are always at your side with the knowledge of our developers and engineers.

We support you in the development of individual cable sets and handle both prototyping and the production of small and medium series. We guarantee fast production and offer you the necessary flexibility to act agilely at all times.

We gladly advise you on technical implementations for getting efficient solutions off the ground. Our expertise covers a wide range of sectors, including automotive, testing, medical technology and industry.

Benefit from our many years of experience and draw on the knowledge of our experts.

Development

We support you in the development of individual cable sets. You benefit from the know-how of our experts and receive a customized product.

Prototyping

You rely on our prototyping so that you will reach your goal faster and not lose valuable time in development. Short delivery times and high quality contribute to your success.

Serial production

Our production capacities allow the manufacturing of small and medium series. As a reliable partner, we accompany you from development to the finished product.

Plug-in connector

To implement your individual projects and guarantee the highest quality standards, we use connectors from well-known manufacturers, including AMP, Delphi, ERNI, Harting, Hirschmann, ITT Cannon, ODU, TE Connectivity (Tyco), Rosenberger and Wieland.

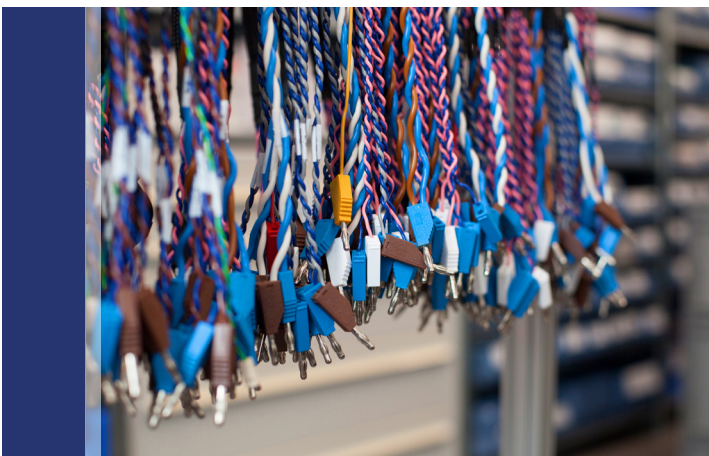

We will provide a detailed list of these connectors on request. Just contact our sales team.

Cable types

Our portfolio of cable types is extremely versatile and covers all areas of application. For the production of prototypes, small and medium series within a short time, we always keep an extensive stock on hand so that we can react agilely and flexibly to your needs and wishes.

For further information, our sales team is available to you at any time. Contact us.

Manufacturing technologies

For the production of cable sets, we are competent in the most commonly used techniques. Only a combination of expertise and quality results in first-class products. In the process, we use the following methods:

manual crimping, soldering, screwing and ultrasonic welding.

We would be happy to advise you on the technical implementation of your project regarding which method would be most effective and efficient for your needs.
