Quality and economy—  
with accountability —

## Thinking ahead. Finding better solutions.

Specializing in testing and measurement technology, we have been working on exciting projects for over 20 years, developing forward-looking solutions and continually exploring new avenues. Experience, foresight and the inventive Herrenberg spirit all combine to offer our customers creative output potential. This makes us not just a trustworthy, reliable partner for our customers, but also an attractive employer for all our workers.

Satisfied customers  
are our goal

# Our product portfolio

## Automotive testing

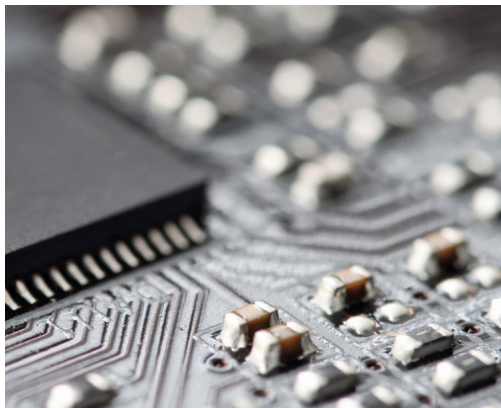

- Testing equipment
- Testing service
- Audio, acoustic

## Industrial testing and measurement technology

- Testing and measurement technology
- Optical inspection
- In-circuit testing (ICT)
- Turbo lab

## Embedded technologies

- Hardware, firmware and software development
- Wireless technologies
- Control unit development
- MFIS display
- Sensors
- Data loggers

## Cross-sector expertise

We specialize in individual products that are customized to your industry and your requirements. Our core competencies are solutions in the areas of testing and measurement technology, automotive (passenger cars and commercial vehicles), mechanical/plant engineering as well as industry and automation—and, of course, go above and beyond.

You can find more interesting information on our competencies, products, projects and technologies on our website at [www.areas.de](http://www.areas.de)

## Made in Germany

In our state-of-the-art production, the focus is on cable assembly and the assembly of test and inspection equipment and electronic assemblies. With automated manufacturing facilities for the production of cable harnesses, Areus excels in series production of small and medium quantities. We're able to respond quickly to new development statuses. It's this flexibility that our customers appreciate. From the idea, to engineering, to production: Areus offers everything from a single source. Simply get in touch with us.

## Future-proof innovations!

Our expert development team works on new products and systems every day. The interesting tasks assigned to us by our customers spur us on to continuously optimize our product portfolio and adapt it to the latest technological advances. Sometimes a standard solution simply isn't enough, even if it's of the highest quality. Our experienced development engineers are always happy to support you by providing sophisticated and sustainable solutions in the areas of software and hardware!

## Certified quality

Clearly structured processes certified by DEKRA and according to DIN ISO 9001 allow for maximum flexibility while maintaining the highest quality standards.
